

Early Childhood Music services

Music with Jk/Sk Children

What to expect!

Each lesson fosters the exploration of sounds and allows children the freedom to create their own music with their voice, body and carefully chosen instruments. With each visit I touch on one musical goal, for example: Beat, rhythm, timbre, pitch, tempo, meter, dynamics, improvisation, musical memory and much more. Majority of my visit focus on the pure enjoyment of music and the magical impact it has on the lives of children and adults.

- Children ages 4-6 don't need as many opportunities for repetition and learn musical concepts a lot quicker.
- Begin the lesson with a call and response song- This gives the children the opportunity to explore their singing voices and listen for note changes and patterns
- Movement games- Movement games with older children involve props, role playing, large body movements and dance
- Singing component with and without instruments
- Learning new and complex rhymes
- Musical games- Support social interaction, role playing, being a leader, turn taking and increases self confidence.
- Instrument exploration- Gathering drum, hand drums, timpani drum, tambourine, sand blocks, rhythm sticks, wood blocks and chime bars
- Storytelling- Through musical books that involve group participation
- Listening component- Introducing new sounds and songs
- Finish the lesson with a call and response song
